

FamilyFix 360

Unique 360° rotating base for quick & easy child installation

The next generation rotating car seat system consists of a rotating FamilyFix 360 base and compatible Pebble 360 and Pearl 360 car seats. FlexiSpin technology makes the base rotate in any reclined position. Thanks to the 360° rotation handle on the base, the 360° car seats can be rotated smoothly and easily using only one hand - perfect for busy parents with their hands full. Visual indicators and audio feedback on the base notify you when your car seat is correctly installed and the anti-misuse rotation lock gives peace of mind, allowing your baby to travel in the rearward-facing position up to approx. 15 months.

- **Intuitive one-hand rotation**
- **FlexiSpin Rotation**
- **Rearward & forward-facing from birth up to 4 years**
- **Installation feedback**

Features

- i-Size safety
- TravelSafe rotation control
